

Our organizations call for Congressional action to ensure individuals who require supplemental oxygen have access to medically appropriate oxygen. Below are our consensus principles for legislative reform:

Four Pillars for Oxygen Reform

- 1. Ensure supplemental oxygen is patient-centric
 - Change "home oxygen" to "supplemental oxygen" to ensure people requiring oxygen can live full lives outside their primary residence
 - Create a patients' bill of rights to ensure care is focused on patient needs
- 2. Ensure access to liquid oxygen for patients for whom it is medically necessary
- 3. Create a statutory service element to provide adequate reimbursement for respiratory therapists to ensure patients have access to their expertise
- 4. To ensure predictable and adequate reimbursement and to protect against fraud and abuse, establish national standardized documentation requirements that rely upon a template rather than prescriber medical records to support claims for supplemental oxygen suppliers.
